

Pierre Mackenzie

Legal Name: Pierre Lardet (he/him)

 PierreRL |  pierremackenzie |  pierre.wiki |  lardet.pierre@gmail.com

EDUCATION

- 2025 – **MSc Computer Science**, *University of British Columbia*
Supervised by Kevin Leyton-Brown and Serena Wang to improve evaluation of AI systems.
Howard Webster Fellow and Advanced Machine Learning Training Network Scholar.
Graduate courses in NLP, ML Adaptation, Bayesian Methods and Algorithms.
- 2021 – 2025 **BSc Computer Science & Mathematics**, *University of Edinburgh* (Grade: 87%, 1st)
Dissertation supervised by Prof. Amos Storkey with grade ‘Distinction’.
Focus on probability, statistics, machine learning and game theory.
- 2023 – 2024 **Exchange Year**, *EPFL* (Grade: 5.7 / 6)
1st place in courses on computer vision and deep learning for biomedicine.

WORK EXPERIENCE

- 2025 **Quantitative Trader Intern**, *Jane Street*
Received full-time return offer.
- 2025 **Graduate Teaching Assistant**, *University of British Columbia*
For CPSC 340: Machine Learning and CPSC 430: Computers and Society.
- 2024 **Research Assistant**, *University of Edinburgh*
Research engineer for a project benchmarking synthetic data generation methods for tabular data under Dr. Fengxiang He
- 2024 **Quantitative Researcher Intern**, *Optiver*
Received full-time return offer.
- 2023 **Machine Learning Research Intern**, *Adarga*
Compared LLMs with semantic similarity methods for topic segmentation. Developed datasets, evaluation metrics and benchmarking pipelines, and fine-tuned open-source models. Drafted a paper for submission to ACL 2025.

RESEARCH

- 2025 **Pierre Mackenzie**, Simon Ghyselincks. *Too Salty: On Model Souping*. [github](#)
- 2025 **Pierre Mackenzie**. *Sparse Random Matrices for Dimensionality Reduction*. [arXiv](#)
- 2025 **Pierre Mackenzie**, Amos Storkey, Alec Wright. *Automatic Chord Recognition with Deep Learning*. (Bachelor’s thesis, Grade: Distinction) [arXiv](#)
- 2024 **Pierre Mackenzie**, Maya Shah, Patrick Frenett. *Topic Segmentation with Generative Language Models*. (Submitted to ACL) [github](#)
- 2024 **Pierre Mackenzie**, Mika Senghaas, Raphael Achddou. *CNNs for Style Transfer of Digital to Film Photography*. [arXiv](#)

PROJECTS

- 2024 **EdinburghAI Workshops** [github](#)
I created and led a series of introductory workshops covering machine learning, neural networks, computer vision and natural language processing. I delivered short lectures and hands-on coding sessions to help students gain insight and practical experience with machine learning. These workshops were attended by over 100 students.
